

# Diagnostic accuracy of FEVER-Pain and Centor criteria for bacterial throat infection in adults with sore throat: a secondary analysis of a randomised controlled trial.

## Supplementary Information

Supplementary Figure 1: ROC Curves for Group A Streptococcal infections

Receiver Operating Characteristic (ROC) Curve analysis showing sensitivity versus 1-specificity each threshold. The different scores are shown next to a point on the graph. Each colour represents the diagnostic accuracy of one clinical prediction rule for Group A Streptococcal infection in adults with sore throat.
