

Supplementary Files

Figure S1. GPs awareness and use of tools used to assess PA.

Survey question: Which of the following tools, to help assess patient physical activity, are you aware of and which do you use?

Figure S2. GPs knowledge of and engagement with PA training.

Survey question: Which, if any, of the following training sessions or e-learning modules have you heard of or undertaken with respect to encouraging physical activity?

Figure S3. GPs knowledge of and engagement with PA campaigns and support tools.

Survey question: Which, if any, of the following physical activity campaigns and support tools have you heard of or used to inspire or support patients to get active?

Figure S4. GPs barriers and enablers to promoting PA to patients.

Survey question: What factors (if any) would encourage you or act as barrier to effectively advising patients about physical activity?

Figure S5. Trusted sources of information among GPs.

Survey question: Which of the following do you see as trusted sources of information that you are likely to respond to?
